

- ▶ When importing your new Print Material and applying it to your garment, you might end up with a different drape. This is due to the Fabric Physics being different.
- ▶ You could copy and paste over each individual value field, but the quickest way is by utilizing the Colorways Workspace.

Colorways Workspace:

- ▶ In the Fabrics Field, select the Material with the Fabric Physics you want to copy from and then on the right-side menu, Select "Copy Material"

- ▶ Afterwards, select the new material and then on the right-side menu, Select "Physics Only."

This will now Paste over the old physics onto your new material.
